

Thank you for your interest.

The V1.1 document you have been redirected to, is obsolete. It has been superceded by:

[Sybase Data Storage & Fragmentation.pdf V2.5](#)

which integrates the three related documents into one PDF, and is substantially expanded, at 31 pages. All links are resolved.

Alternately, visit our **[Sybase GEM Documents](#)** webpage that lists the various documents that I have published on the web, in HTML format, and choose what you like.

This document remains as a placeholder to assist anyone using links (contained in various posts across the web) that are out of date.

This page is required to overcome a document production bug.
